SUBJECT INDEX, VOLUME II

Absorption, of softener by regenerated cellulose, 236
Adsorption, of water vapor by organic films, 241
Alkyl vinyl ethers, radiation-induced polymerization, 122
Anisotropy, of thermoplastic moldings, 289
Antioxidant action, and stabilization of hydrocarbon systems, 345
Butadiene-styrene/polychloroprene blends, transition behavior, 8
Calcium hydroxyapatite, occluded, in polystyrene beads, 203
Cellulose, cinnamate esters of, 302
  regenerated, softener absorption by, 236
  regeneration from viscose solutions, 192
Chemorheological study, polysulfide liquid polymers, 39
Chlorine, estimation in high polymers, 125
Coacervation, 46
Condensation polymers, from diisocyanates and dioximes, 81
  from diisocyanates with dihydrazides and hydrazine, 155
Copper, migration through polymethyl methacrylate, 253
Corona discharge, effects on polyethylene, 163
Crosslinking, chemical, of vinyl polymers, 246
  in elastomers, 328
  in natural rubber vulcanizates, 1, 257
  from radiation of rubber, 340
  of unsaturated polyesters, 368
Crystallinity, isotactic polypropylene, 166
  polyethylene terephthalate, 205
Crystallization, isotactic polypropylene film, 66
Degradation, chemical, of polyethylenes, 210
  oxidative, of polydiene vulcanizates, 186
  polyethylene terephthalate in nitrobenzene, 124
  thermal, of methylphenylsilicone, 297
  thermal-oxidative, of polyethyl acrylate, 86
Density, isotactic polypropylene, 166
Diisocyanates, condensation polymers from, 81, 155
Dioximes, condensation polymers from, 81
Dynamic mechanical properties, measurement, 333
  nylons, 56
Dynamic rigidity modulus, wool fiber, 32
Elastic materials, foamed, failure of, 354
Elastomers, mechanism of radiation damage, 328
Electrical properties, of epoxy resins during polymerization, 108
Epoxy resins, electrical properties during polymerization, 108
Fiber formation, from polymer melts, 14, 24
Films, organic, and adsorption of water vapor, 241
Fractionation, by gradient elution, 100
Glass transition, in polymers, 93
Gradient elution, for large-scale polymer fractionation, 100
Heat distortion temperatures, of plastic compositions, 371
Hydrocarbon systems, mechanism of antioxidant action in stabilization of, 345
Hydrogen peroxide, permeability of polymers to, 231
Hydroxybenzoic acids, polyesters of, 198
Impact strength, thermoplastic moldings, 289
Infrared absorption spectra, rubber, 340
Isotacticity, estimation in semicrystalline polymers, 351
Keratin, sorption of water by, 189
Kinematics, of a rolling tire, 174
Mechanical properties, diffusion-controlled, of polyvinyl alcohol and polyvinyl formals, 71
Membranes, osmotic, of organic polymers, 264
Methylphenylsilicone, thermal degradation, 297
Molecular weight distribution, from gel-sol ratios, 273
Nylon, dynamic mechanical properties, 56
  sorption of water by, 129
Organic polymers, osmotic membranes of, 264
Orientation, isotactic polypropylene film, 66
Orientation phenomena, 14, 24
Oxidation, of polyethylene, 281
Peeling, 216
Permeability, of polymers to hydrogen peroxide, 231
Phase separation, rubber–polymethyl methacrylate–solvent systems, 120
Photosensitive polymers, 302, 308
Plastisols, gelation of, 312
Polyamides, irradiated, spectra of, 181
Polycapronamide, 14
Polychloroprene, transition behavior, 8
Polydiene, vulcanizates of, oxidative degradation, 186
Polyesters, of hydroxybenzoic acids, 198
  unsaturated, control of temperature rise in crosslinking, 368
Polyethyl acrylate, thermal-oxidative degradation of, 86
Polyethylene, chemical degradation and mechanical testing, 210
  cold-drawing of, 252
  effect of corona discharge upon, 163
  effect of radiation on melt index of, 363
  mechanism of oxidation, 281
Polyethylene oxide, solubility behavior, 126
Polyethylene terephthalate, degradation in nitrobenzene, 124
  x-ray diffraction of crystallinity, 205
Polymer melts, fiber formation from, 14, 24
Polymethyl methacrylate, migration of copper through, 253
  phase separation in systems with rubber and solvent, 120
Poly-α-methylstyrene, effect of radiation on, 134
Polypropylene, isotactic, crystallization and orientation, 66
  isotactic, the density, crystallinity, and heptane insolubility in, 166
  isotactic, x-ray diffraction of biaxially oriented specimens of, 62
Polystyrene, beads, occluded calcium hydroxyapatite in, 203
Polysulfide liquid polymers, chemorheological study, 39
Polytetrafluoroethylene, 251
Polytetrafluoroethylene resin, effects of gamma radiation on some physical properties of, 114
Polyvinyl alcohol, cinnamate esters of, 302
  diffusion-controlled mechanical properties, 71

Polyvinyl-*trans*-benzalacetophenone, 358
Polyvinyl cinnamate, sensitization of, 308
Polyvinyl formals, diffusion-controlled mechanical properties, 71
Radiation, and crosslinking of rubber, 340
effect on melt index of polyethylene, 363
effect on poly-α-methylstyrene, 134
gamma, and physical properties of polytetrafluoroethylene resin, 114
Radiation damage, elastomers, 328
Radiation-induced polymerization, alkyl vinyl ethers, 122
Rheology, of plastisol, 312
viscoelastic materials, 143
Rubber, natural, degree of crosslinking in vulcanizates of, 1, 257
phase separation in systems with polymethyl methacrylate and solvent, 120
radiation crosslinking of, 340
Rubber vulcanizates, stress relaxation measurements, 318
x-ray diffraction for zinc oxide in, 225
Semicrystalline polymers, isotacticity in, 351
Solubility behavior, of polyethylene oxide materials, 126
Sorption, of water by keratin fibers, 189
of water by nylons, 129
Sorption process, and dynamic rigidity modulus of wool fiber, 32
Spectra, irradiated polyamides, 181
Stress relaxation measurements, rubber vulcanizates, 318
Stress-strain behavior, natural rubber vulcanizates, 257
Styrene-butadiene/polychloroprene blends, transition behavior, 8
Tire, kinematics, 174
Tire cords, test for loss in curing, 337
Thermoplastic moldings, anisotropy and impact strength, 289
Thermosetting molding compound, flow measurement, 322
Ultraviolet spectra, rubber, 340
Vinyl polymers, effect of chemical crosslinking on properties, 246
Viscoelastic materials, instruments for rheological investigation, 143
Vulcanizates, transparent, protection against ageing in sunlight, 367
Water vapor, adsorption by organic films, 241
Wool fiber, dynamic rigidity modulus, 32
X-ray diffraction, biaxially oriented specimens of isotactic polypropylene, 62
polyethylene terephthalate, 205
for zinc oxide in rubber vulcanizates, 225
Zinc oxide, in rubber vulcanizates, 225
